The Tool

INSIGHTS 360

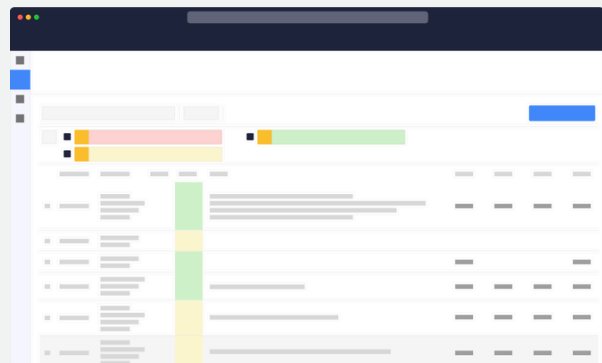

Insights 360 is an integrated computational analytics solution that provides management with a 360-degree, real-time view of its business.

This flexible system connects to multiple data sources, consolidates information, performs heavy computational analysis, and produces a wide range of analytics reports, plots, and visualization dashboards.

Beyond traditional Business Intelligence tools, Insights 360 offers a comprehensive web application platform. It supports advanced charts, dashboards, and reports, while also enabling manual data entry, complex data computations, and robust roles and permissions management. Additionally, Insights 360 features strong governance and auditing capabilities, along with built-in alerts and notifications.

These capabilities makes Insights 360 a versatile solution for creating interactive, secure web applications that seamlessly integrate data visualization and operational workflows.

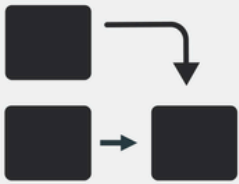

Reports & Dashboards To Meet Your Precise Needs

Beyond Analytics

A MODERN PLATFORM

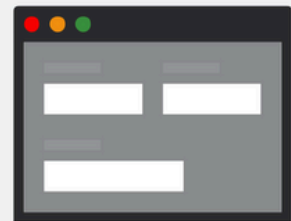

An application built with Insights 360 surpasses traditional Business Intelligence tools by providing a comprehensive web application platform. Insights 360 supports advanced charts, dashboards, and reports, while also enabling manual data entry, complex data computations, and robust roles and permissions management.

ALERTS AND NOTIFICATIONS

By leveraging Insights 360 organizations can build robust applications with proactive and integrated alerting capabilities.

Example capabilities include:

- **Threshold Alerts:** Set alerts for data thresholds (e.g., expenses exceeding a limit) to trigger timely emails or notifications.
 - **Date-Based Alerts:** Configure alerts for date-specific events (e.g., collection days over 30) to maintain efficiency.
 - **Automated Data Checks:** Implement checks to detect data discrepancies, sending immediate notifications for errors.
 - **Custom Business Logic Alerts:** Create alerts based on complex conditions, such as inventory and sales forecasts.
 - **Workflow Integration:** Integrate alerts into workflows, triggering actions like purchase orders and audit logs.
 - **Real-Time Notifications:** Provide instant, in-app notifications for critical operations requiring immediate attention.
- 

4 reasons why it matters

INCREASE REVENUE

With real-time and accurate data provided by Insights 360, organizations can make better-informed decisions that can positively impact revenue. This includes identifying new cross-selling opportunities, customer behavior patterns, optimizing pricing strategies, and improving collections.

IMPROVE DECISION-MAKING

Insights 360 consolidates and processes data from different disconnected sources, providing a comprehensive view of business operations. The management team can therefore quickly and accurately make informed decisions, identifying areas for improvement, trends, and opportunities to further improve the business.

IMPROVE EFFICIENCY

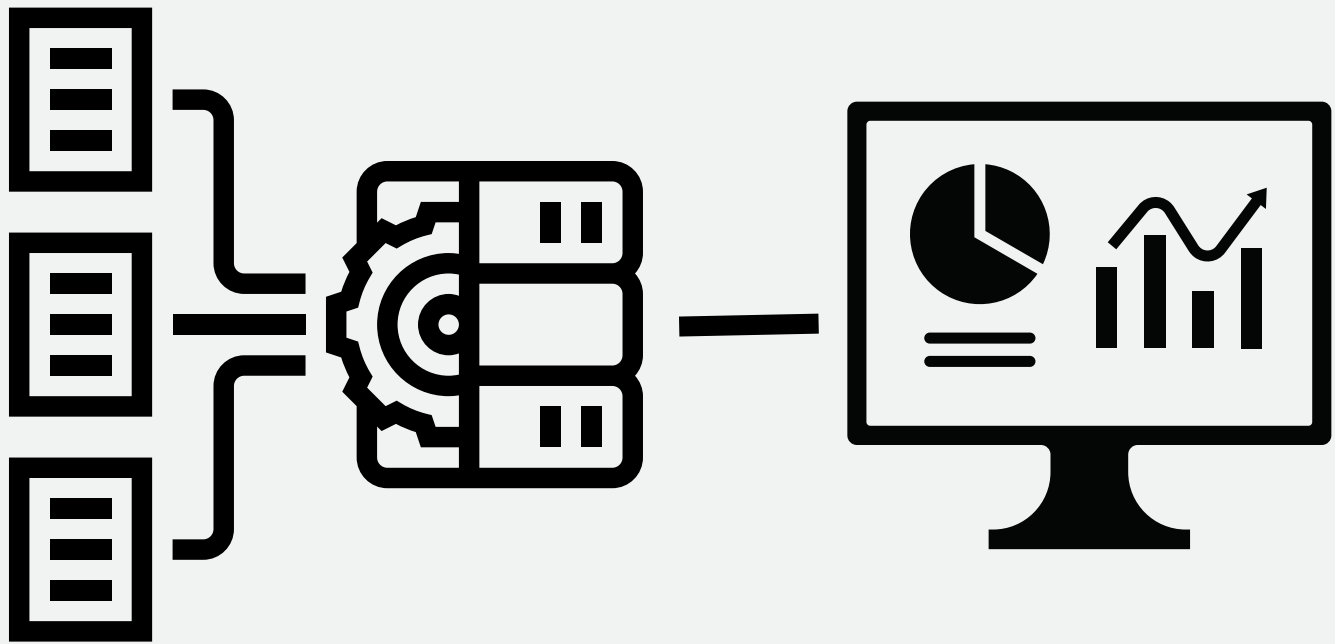

Insights 360 streamlines internal organization reporting, saving valuable time and effort. This improves overall efficiency and productivity, allowing the management team and employees to focus on other important tasks.

LOWER RISK

With Insights 360 you can have more confidence in the accuracy of your data performing auditing to identify weak spots in your current business processes and data handling. With Insights 360, accurate data becomes the new foundation for smart business decisions.

How it Works

Your Data > Insights 360 > Your Insights

Connect to any system, consolidate information execute algorithmic analysis, produce reports and send alerts,

About

TDVG

The Digital Value Group (TDVG) is a boutique Information Technology firm with a mission to support its clients in generating new value, lowering costs and risks, and enhancing agility.

TDVG offers tailored IT advisory, technology solutions, and application development services. It provides a fresh perspective coupled with strong delivery capabilities, built on a foundation of in-depth domain expertise, international experience, and a strong quality control and governance mindset.

Our experience allows us to take a practical approach to technology that enables businesses across all industries to achieve measurable results quickly.
