Manage Contracts with Ease

Contracts Management 360 (CM360) is an enterprise-grade application enabling organizations to manage their contracts with ease. It allows for a comprehensive view of contract metadata, including obligations, entitlements, key milestones and alerts.

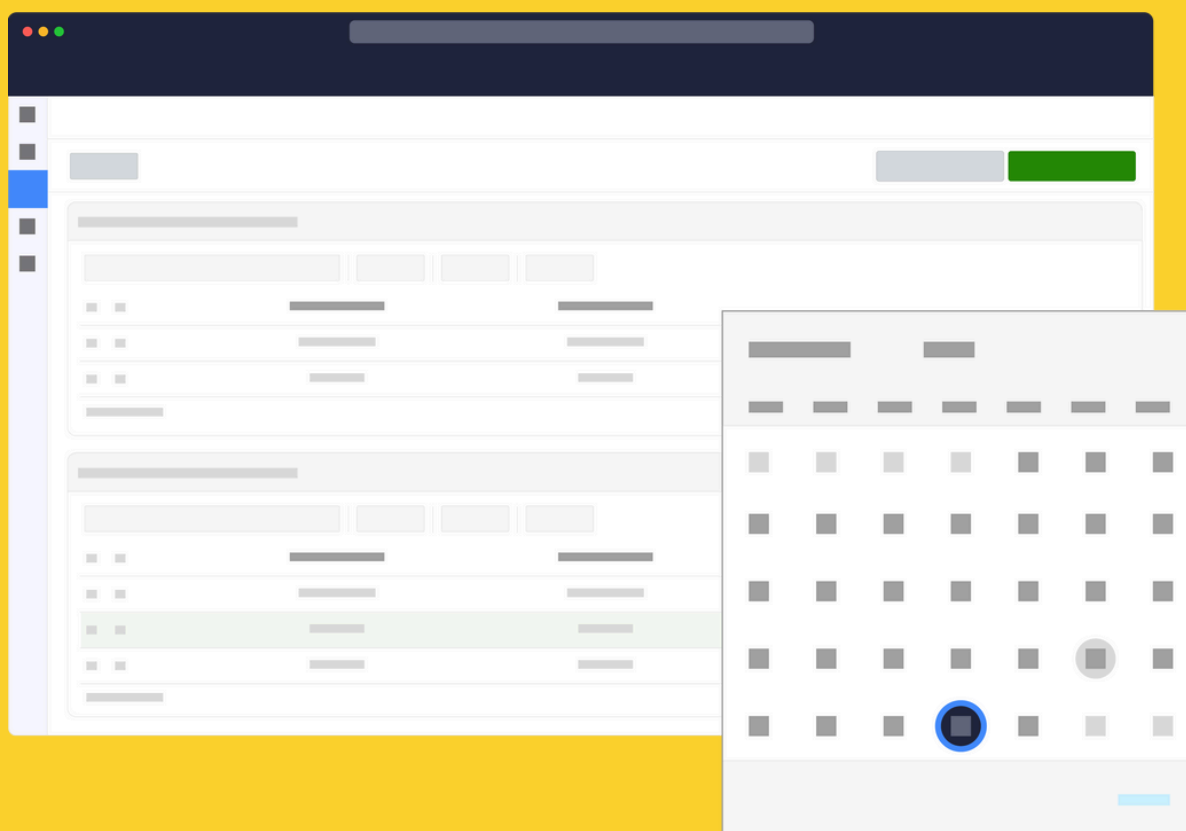

360 Degree Management

List and manage contract data in a modern repository.

Milestone & Alerts

Get reminded about upcoming contractual milestones.

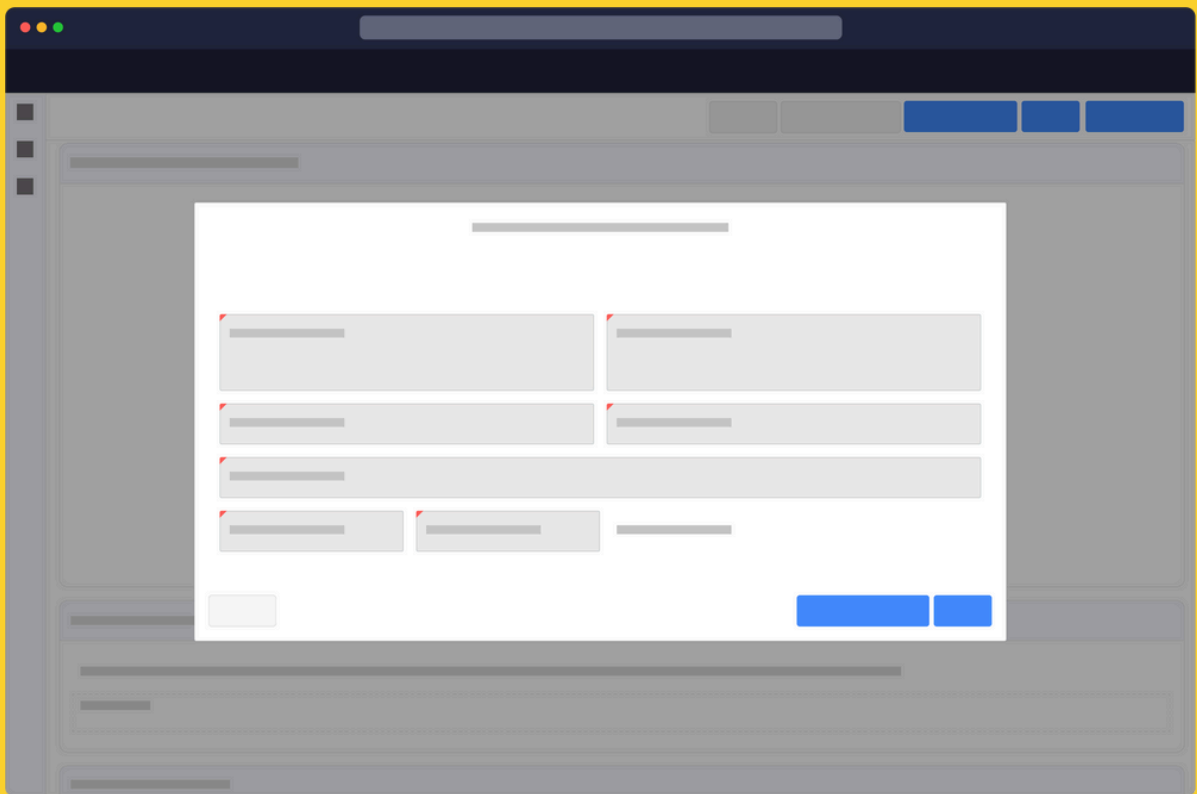

Commercial Visibility

Gain complete visibility on receivables or payables.

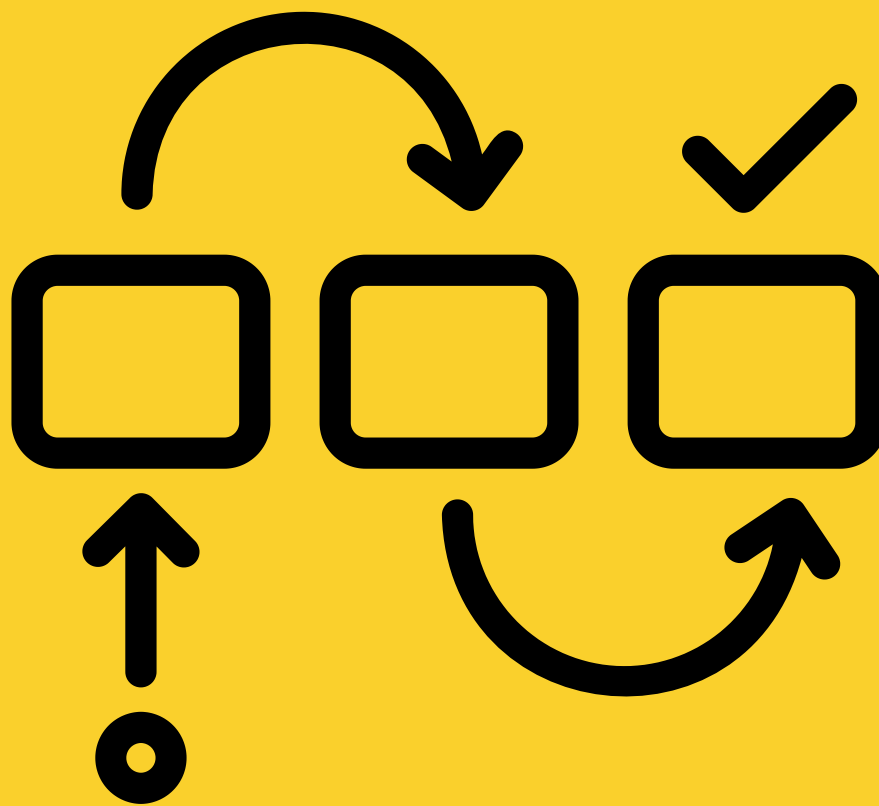

Stakeholder Management

Organize contracts by relevant stakeholders.

Drive Complex Workflows

Drive complex governance and approval flows.

Why Manage Contracts

Do away with inefficient processes and associated risk

Deal with Missed Opportunities and Revenue Leakage

Do away with revenue leakage, missed savings, and reduced profitability.

Improve Visibility and Gain Control

Do away with difficulties in tracking key contract terms, obligations, and deadlines. Address all compliance issues and reduce risk exposure.

Reduce Compliance Risks and Legal Exposure

Reduce exposure to legal risks, penalties, and disputes. Maintain compliance and mitigate legal exposure effectively.

Types of Documents

(sample, not exhaustive list)

- Vendor Agreements: Manage vendor relationships, pricing, delivery schedules, and service levels.
- Service Level Agreements (SLAs): Track performance against agreed-upon service levels.
- Partnership Agreements: Monitor commitments and responsibilities in partnerships.
- Lease Agreements: Track lease terms, rental payments, and renewal dates for assets or properties.
- Corporate Governance Documents: Monitor compliance with corporate policies and procedures.

Clarity from Data

Transform overwhelming volumes of contracts into manageable information.

Security

Leverage enterprise-grade technology to secure your most valuable data.

Built on Oracle

Built on a modern application development platform: Oracle APEX.
